# TYRONE STORMWATER NEWS UPDATE

## FALL 2020

BRAD KONWICK, ENVIRONMENTAL  
DEPARTMENT

During Fall is a great time to manage vegetation in subdivision stormwater ponds. Many residents don't realize their homeowner's association (HOA) can be responsible for maintaining the stormwater detention facilities in their subdivision. The most common item that needs attention with ponds is vegetative management, along with removal of trash and debris from the outlet structure, and erosion protection/stabilization. This [link](#) briefly talks about some of these issues with stormwater ponds.
